

Mandatory Organics Recycling Collection Program for the City of La Verne

Effective January 1, 2022, all California businesses, multifamily complexes, and residences will be required to separate organic waste from trash and subscribe to an organics collection program per State law SB 1383. Organics consist of food waste, compostable food-soiled paper, and green or yard waste. SB 1383 was passed to divert more food waste and yard trimmings from our landfills to reduce greenhouse gas emissions and slow climate change.

New State law SB 1383 is in addition to other current California laws established to protect the environment:

- State law AB 341 - requires most businesses to recycle
- State law AB 1826 - requires businesses that generate 2 or more cubic yards of solid waste per week to have organics collection service

Waste Management Can Help your Business Become Compliant and Meet SB 1383 Regulations:

Step 1. Subscribe to Recycling, Organics and Trash service now –

We offer free onsite or virtual visits, assessments and technical assistance to help you set up your recycling, organics, and trash programs to maximize diversion cost-effectively.

Contact Waste Management at (909) 599-1274 Monday through Friday 9 a.m. - 5 p.m. or email cslosangeles@wm.com to set up collection service, or contact the City of La Verne at (909) 594-8741.

Step 2. Train and educate employees, tenants, residents, and customers to properly sort all waste to ensure requirements are met.

Waste Management can provide education and resources like an Employee Training Guide, Posters, and proper container setup and signage to make sure materials are disposed of properly.

Step 3. Sort waste into proper containers. Materials must go into the right containers to avoid contamination and possible service charges. AB 827 requires businesses to provide 'front of the house' recycling and/or organics containers with labels to collect recyclable materials generated from products purchased on the premises.

SB 1383 is designed to be good for your business, your community, the state of California, and the environment.

Working together, we can:

Reduce organic materials going to the landfill, decreasing greenhouse gas emissions

Explore cost savings from right-sizing containers and service levels

Help you set up a comprehensive material management program that meets requirements and is compliant with SB 1383

Provide free in-person or virtual training for your employees to sort materials correctly and avoid contamination charges

Set Up your Waste and Recycling System for SB 1383 Compliance

Commercial businesses are mandated to have organics, recycling, and trash services. Let our fully trained staff assist you in assessing your waste generation needs to determine the right container sizes and service levels to maximize diversion, ensure compliance, and be cost-effective.

- Contact Waste Management at (626) 252-1052 to schedule an in-person or virtual assessment
- Make sure all three containers are paired together in areas where employees generate waste. Properly label each container to encourage proper sorting.

Recycled Organic Waste will be composted.

Commercial Cart Service and Commercial Bin Service

Carts and bins are available in different sizes for organics, recycling, and waste collection depending on the amount of waste your business generates. Contact us at (626) 252-1062 to schedule an in-person or virtual assessment.
